Subject: AGENDA for Tomorrow's MAY agristats review meeting (3 - 5 p.m.)
Attachments: Add'l MAY agri information.xlsx

This attachment was included in the meeting notice.....and is additional pages (not included in your hardcopy packet)

I have NOW added another tab: Agenda (It is the first tab in the file.)

Please print AGENDA tab and reprint the DIVISONAL MAY tab (made one change).

Intent of chart/bullet points on agenda is to stimulate discussion on ideas/programs to change/improve our current positions on primal returns, offal/rendo, and hogcost.

PRODUCED IN NATIVE FORMAT

Highlights of: May Agristats Tyson Divison/All plants (page 4)

Page 4 overview

1st place
Tys exceeds West

--Debbie 8/10/2011

	Louisa	\$ 31.70	\$ 7.56	\$ 9.03	\$ 20.36	\$ 20.90	\$ 10.43	\$ 4.01	\$ 9.86	\$ 92.29	\$ 92.90	\$ 8.58	14		
	Perry	\$ 30.17	\$ 7.33	\$ 10.54	\$ 21.26	\$ 21.62	\$ 10.37	\$ 4.01	\$ 9.09	\$ 92.20	\$ 92.81	\$ 9.50	12		

Butt - Agri value includes butt plates - value to SL \$.54 (\$10.93 vs\$10.39); added \$.54 to all Tyson when considering if exceeding 'West'

Agri rendo includes some cut floor rendo (Tyson locations used 'drop' (offal and kill rendo); to determine if exceed West, added +\$.29 to all

Western locations not included above: Beardstown (10th IOE); IPC (11th IOE); Eastern locations not included (Hatfield, Clinton, Tarheel, Smithfield)

Considerations:

Pump gain (net of expenses) is included in Agristats. Logansport numbers (above) are only the Fresh P&L; Will add Pump for June/forward. May EBIT was+\$300K
This would impact Logansport IOE (and ranking) as well as loin, rib, and butt primal returns.

Loins: Logan exceeds the West...and is only \$.56/cwt lower than the top loin return (displayed); Adding pump gain (net of exp) will help.
Division is below the 'west'

Ribs: All locations (including the division) except Louisa and Perry 'exceed the west'

Picnics: Logan, Madison, and Perry exceed the West. Division trails by \$.12/cwt hot.

Bellies: Storm Lake, Logan, and Perry exceed the West. Spread between SL agri and SL Tyson is trim reconciliation performed by Agri.

Hams: Logansport and Perry exceed the West.

Butts: Logan, Madison, and Perry exceed the West (when add the \$.54/cwt value assumption for Butt plates (var between SL agri/Tyson)

Offal/Rendo: Tyson locations - drop only (offal plus kill rendo); Agri includes some cut floor rendo (lack of separation)
When increase all Tyson locations by the spread between SL agri and SL tyson, Division 'ties' with West; WAT and LOU exceed.

Hogcost Waterloo hogcost is cheaper than the West (with the same \$.61/cwt added for SL procurement cost)

IOE for Agri Ranking out of the 12

IOE for Tyson loc Ranking out of 17 (12 Agri plus 5 Tyson)

* Production mix document (Otten/Stolze) assumes std yield and inv price

**Added March hashgut bonus \$'s/hd;Source document: Weekly Pork GM packet.

Belly is trim balancing primal

Note: Butt - primal has skin/butt plates added back for all butts (our process does not); Agri will be higher.

"Balance cutout-" for all would include Offal/Rendo SI's, misc value (feet, tails, jowls, etc - vs the std value assigned); also inventory and corresponding values (if not produced in current month; or if not sold)
